Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .and body, and with it to an increased vitality and resistance to disease. As regards the main group diseases which cause deaths of infants, it is very evident that the favorable status of infant mortality in 1919 was due to the very noticeable diminution in the morbidity incidence and the mortality from contagious and respiratory diseases in infancy. While the infant mortality rate from contagious diseases was 4.3 for the Greater City in 1918, it was only 1.9 during 1919. Similarly, while the infant mortality rate for respiratory diseases in infancy was 21.7 during 1918, 15.5 was the rate recorded for 1919. The infant mortality rate from congenital diseases has remained practically stationary as it has for a great many years past, the rate being 38.7 during 1918 and 37.2 during 1919. The infant deaths from diarrhoeal diseases was slightly increased, the rate being 14.7 for...
