

Clinical Trials: What Patients and Volunteers Need to Know

Filesize: 4.86 MB

Reviews

A fresh eBook with an all new standpoint. It is actually writter in simple words and phrases instead of difficult to understand. You wont sense monotony at at any moment of your own time (that's what catalogs are for relating to if you question me).

(Dr. Marcel Collins)

Oxford University Press Inc. Paperback. Book Condition: new. BRAND NEW, Clinical Trials: What Patients and Volunteers Need to Know, Lorna Speid, Every year, hundreds of thousands of healthy volunteers and patients worldwide undertake the journey through the maze that can be clinical trials. Research participants take part in clinical trials for a variety of reasons. The healthy volunteers may be seeking extra money to pay off college tuition, or they may know someone who is suffering and would potentially benefit from the results of the trial. The patient who is terminally ill might participate in a clinical trial simply as a last hope for a cure. Whatever the goals, though, most participants will experience the same sense of bewilderment as they encounter the jargon and medical terminology that they will hear and have to read about and understand during the course of the clinical trial. Clinical Trials: What Patients and Volunteers Need to Know demystifies the entire process, focusing on the process of drug development, and the clinical trial itself. Writing from a lifetime of experience, the author provides important questions to ask those running a clinical trial, key definitions and terms for a participant to know and understand, as well as anecdotes illustrating the clinical trial process. The author also grapples with the idea of "informed consent," providing mechanisms for patients and volunteers to feel fully informed before signing up for the trial. A vital resource for those who are considering enrolling in a clinical trial, or for the parents, friends, or relatives of those involved in a clinical trial, this book takes away the mystery and allows the participant to enter a clinical trial feeling both informed and confident.
