

The Kaiser's Chemists: Science and Modernization in Imperial Germany

By Jeffrey Allan Johnson

The University of North Carolina Press, United States, 2010. Paperback. Book Condition: New. 1st New edition. 236 x 155 mm. Language: English . Brand New Book ***** Print on Demand *****.In the early twentieth century, an elite group of modern-minded scientists in Germany, led by the eminent organic chemist Emil Fischer, set out to create new centers and open new sources of funding for chemical research. Their efforts led to the establishment in 1911 of the chemical institutes of the Kaiser Wilhelm Society for the Advancement of the Sciences, whose original staff included several future Nobel laureates. Although these institutes were designed to promote free research that would uphold German Leadership in international science, they also came to promote the integration of science in the German war effort after 1914. According to Jeffrey Johnson, the development of the Kaiser Wilhelm Institutes exemplifies the origins and dilemmas of one of the most significant innovations in modern science: the creation of institutions for basic research, both theoretical and practical. The Kaiser Wilhelm Society was a quasi-official institution under the protection of Kaiser Wilhelm II, but it received most of its funding from German industry rather than the Imperial Treasury. After 1914, however,...
