## THE PRAGMATIC MIND: EXPLORATIONS IN THE PSYCHOLOGY OF BELIEF

Duke University Press, United States, 1997. Paperback. Book Condition: New. New.. 216 x 153 mm. Language: English . Brand New Book. The Pragmatic Mind is a study of the pragmatism of Emerson, James, and Peirce and its overlooked relevance for the neopragmatism of thinkers like Richard Rorty, Stanley Cavell, Stanley Fish, and Cornel West. Arguing that the original pragmatists are too often cited casually and imprecisely as mere precursors to this contemporary group of American intellectuals, Mark Bauerlein explores the explicit consequences of the earlier group's work for current debates among and around the new pragmatists. Bauerlein extracts from Emerson, James, and Peirce, an intellectual focus that can be used to advance the broad social and academic reforms that the new pragmatists hail. He claims that, in an effort to repudiate the phony universalism of much contemporary theory, the new generation of theorists has ignored the fact that its visions of pragmatic action are grounded in this old school, not just in a way of doing things, but also in a way of thinking about things. Despite its inclination to regard psychological questions as irrelevant, the pragmatic method demands a pragmatic mind - that is, a concept of cognition, judgement, habit, and belief like the one found in the work of the old pragmatists. In offering neopragmatism a theory of the mind taken from Emerson, James, and Peirce, The Pragmatic Mind suggests that the neopragmatists' arguments can be sharpened across a variety of disciplines.
