CHAPTER III TRIGONOMETRIC FUNCTIONS LESSON XVII--THE GENERAL ANGLE AND ITS MEASURES 17. 1. Definition of an Angle. In elementary geometry an angle is frequently defined as the difference in direction, or the amount of opening, between two lines which meet, or tend to meet, in a point. According to this definition no angle can be greater than a straight angle, for obviously the difference in the direction between two lines is greatest when they extend in opposite directions. For the purposes of higher mathematics it is convenient to think of an angle as formed by...
