OUT OF POCKET

Out of Pocket How Collective Amnesia lost the world its wealth, again

Clashes are the kinds of wisdom. That's why we ignore them. Particularly those with warnings: "the value of your investments may go down as well as up" and especially in the happy days of a financial boom. Shock! Horror! The clash was real and we are left asking, not a crazy one known as the financial markets. The last happened before this time is a whopper but it shows the symptoms of the crash to which your parents lost money and their parents and theirs before them. So don't believe this is the last crash crash. There are teenage versions also now who will crash country and guide our children into the teen boom and its collapse.

Collective Amnesia creates the long view is remembered as we watch the pendulum swing from greed to fear and back again. This isn't just a disease of a shadowy group of bankers but is a common thread to which we all share - politicians, regulators, politicians, even ordinary users or buyers of houses, cars and consumer goods, we all shared the market up the hill and over the cliff and we all end up on the ground.

Written by a senior banker with many years' experience, this book takes the long view. It shows how simple the basics of banking are and tells the stories of how we lost money in similar ways over the centuries. Read it and you might just have lost money.
