

The Sloyd System of Wood Working

By Benjamin B. Hoffman

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: . . . of any model will be called the sides; the two smaller surfaces in the direction of its grain, the edges; and the two remaining surfaces, showing the ends of the fibers, will be called the ends. The expression corners will refer to the lines in which any surfaces meet. Geometrically speaking, this would be incorrect; but mechanically--that is, in the language of the shop--it is not. The woods, white birch, cherry, red oak, and white wood, will be abbreviated, W. B. , C, R. O. , W. W. Their prices are: birch, about 5 per hundred; cherry, 7 per hundred; white wood, 4 to 6. Board measure is twelve inches square (surface measure) and one inch or less in thickness. The woods can be obtained in all thicknesses up to six inches, varying in each case by one fourth of an inch in thickness. The length...
